NURSE CLINIC MIND MAP

NURSE CLINIC BUILDING BLOCKS

A clear plan
- Show how your clinic fits with the health of your community
- Determine your 'big picture' aims and specific goals
- How can you create a compelling business case?

Location & Facilities
- Do you have the space to run the nurse clinic?
- Determine when and where your clinic will open; how many sessions per week?
- What equipment will you need?

Staffing & HR
- Make strong connections inside and outside your clinic
- Get the HR basics (and your team) right!
- What are the professional development needs for the nurse clinic team?

Patient Engagement
- Patient pathways – how will a patient move through your nurse clinic?
- Patient eligibility – define the patient criteria for your nurse clinic
- Design a service delivery model that meets the needs of the patient

Funding
- Understand how to fund a nurse clinic and plan a budget
- Explore various sources of clinic funding
- Better understand the role of the MBS in funding a nurse clinic

Evaluation
- Be clear about what it is you are trying to achieve and how will you determine if your clinic is successful?
- Who are you trying to help and in what ways?
- What are the criteria that you will use to judge success?

Best Practice
- Apply clinical guidelines based on the most current evidence available
- Develop a knowledge base for the clinical care required in the nurse clinic
- Implement processes to deliver the highest quality care

Systems & Processes
- Develop a responsive and flexible appointment system that accommodates patient and staff needs
- Create processes to manage patient recalls and reminders
- Understand your data management and privacy obligations
